

The wedi world of systems

Superior guaranteed safety with unrivalled ease of use

01 Waterproof

The blue XPS core is 100 % waterproof and still functions if it becomes damaged.

02 Safe

For maximum safety with shorter installation times, simply use wedi 610 for the watertight sealing of the butt joints of the basic wedi building board material.

03 Heat insulating

All of our building board systems provide fantastic insulation, save energy costs and provide long term protection against mould and fungus.

04 abP*, CE, VOC, ETA

These approvals verify that wedi products are tested sealing systems for wet rooms, and due to their A+ labelling, they also indicate their non-hazardous and low emissions design – according to both German as well as European regulations and laws.

* abP (Allgemeines bauaufsichtliches Prüfzeugnis) German General Building Inspection Certificate for tile and board coverings, also in areas which bear heavy loads

We only use the best materials for the best systems

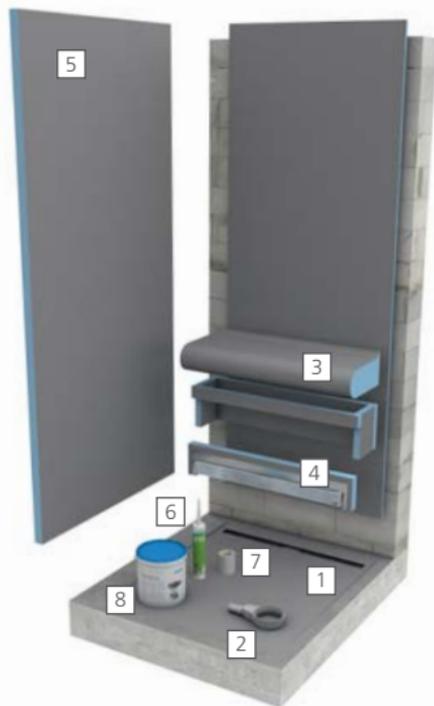

The bathroom systems from wedi stand out thanks to their straightforward, safe and modular construction, without being limited in terms of their variety of designs, for instance. Furthermore, all wedi products are certified for use in wet rooms according to German and European standards, and are 100 % watertight.

Example of system wall drain integrated in bench

Products used

- 1 [wedi Fundo Riolito](#) ▪ the shower element with linear drainage
- 2 [wedi Fundo Riolito drain](#) ▪ in this case with a horizontal Mini Max DN 40 drain
- 3 [wedi Sanoasa Bellina](#) ▪ bench
- 4 [wedi Fundo Riolito Discreto](#) ▪ the visual wall drain, in this case, integrated in the carrier element of the bench
- 5 [wedi building boards](#) ▪ as free-standing partition wall and for the cladding of wall surfaces
- 6 [wedi 610](#) ▪ adhesive and sealant for the watertight adhesion of joints
- 7 [wedi Tools reinforcement tape](#) ▪ for reinforcing joints
- 8 [wedi Fundo sealing set](#) ▪ especially for the sealing of Fundo floor elements to non-system materials such as screed

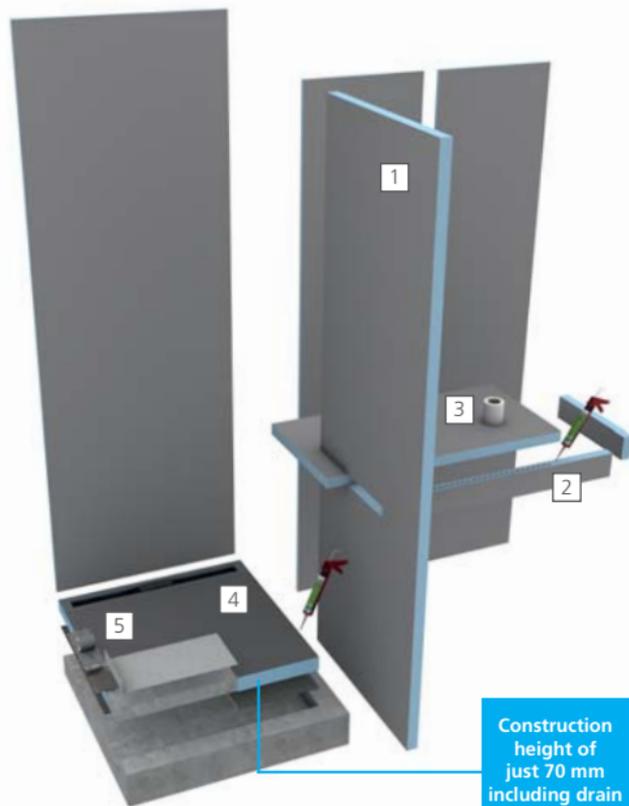

Example of system linear drainage

Products used

- 1 **wedi building boards** ▪ for the precise design of wash stand solutions
- 2 **wedi 610** ▪ adhesive and sealant for the watertight adhesion of joints
- 3 **wedi Tools reinforcement tape** ▪ for reinforcing joints
- 4 **wedi Fundo Plano Linea** ▪ shower element with integrated drainage technology
- 5 **wedi Fundo sealing set** ▪ especially for the sealing of Fundo floor elements to non-system materials such as screed

Example of system point drainage

Products used

- 1 **wedi Fundo Plano** ▪ extremely flat flush to floor shower element with integrated drain technology
- 2 **wedi building boards** ▪ for constructing shower screens
- 3 **wedi Tools sealing tape** ▪ for the watertight connection to non-system materials such as screed
- 4 **wedi 610** ▪ adhesive and sealant for the watertight adhesion of joints
- 5 **wedi Tools reinforcement tape** ▪ for reinforcing joints

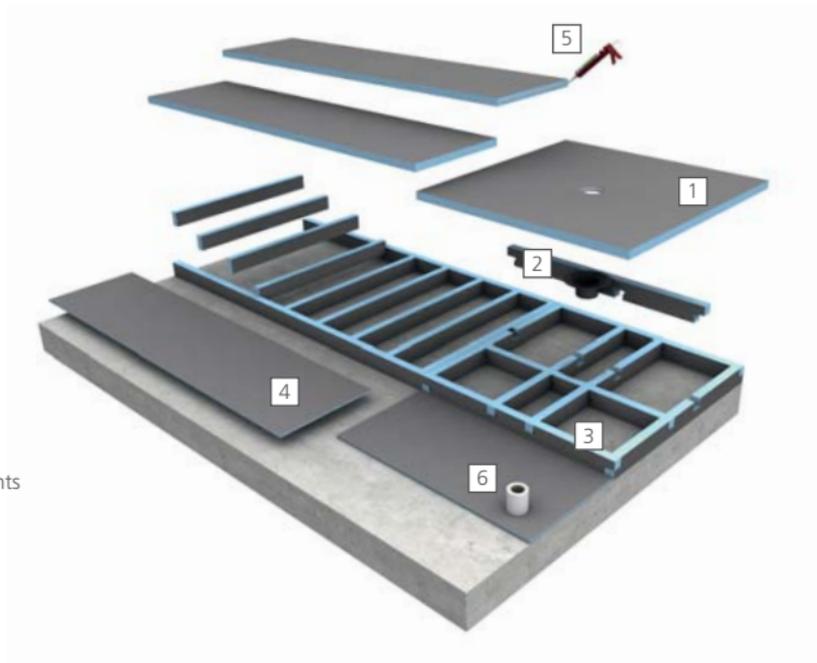

Example of system base construction

Products used

- 1 **wedi Fundo Primo** ▪ shower element, in this case with central point drainage
- 2 **wedi Fundo drain** ▪ in this case with a horizontal DN 50 drain including drain cover
- 3 **wedi Fundo Primo Easy Set** ▪ the straightforward connecting substructure system in a complete set
- 4 **wedi building boards** ▪ for the cladding of adjoining areas
- 5 **wedi 610** ▪ adhesive and sealant for the watertight adhesion of joints
- 6 **wedi Tools reinforcement tape** ▪ for reinforcing joints

High quality channel covers for the linear drainage

A close-to-wall linear drainage system means a special design in every shower. The shower becomes a highlight when the linear drainage is enhanced with the new wedi channel covers. Available as a standard, exclusive or tileable design.

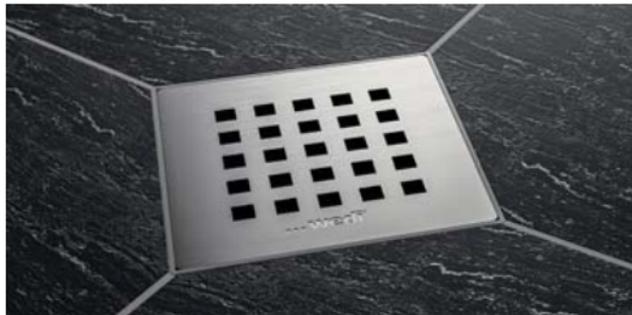

Exclusive grates for point drainage

The new wedi grates convince with their design and quality. It is their precision detail that gives the shower its special touch. Whether in the round or square design, as a standard version or in solid stainless steel – wedi grates are the perfect solution for all designs and colours of tile.

Example: wedi Fundo Fino 1.1

Example: wedi Fundo Fino 5.1

Example: wedi Fundo Fino 4.2

Example: wedi Fundo Fino 3.2

Certified safety in every one of wedi's systems

The CE labelling of the wedi products verifies their tested and approved use as a sealing system for wet rooms.

Systems from wedi are labelled with the French VOC classification. A+ stands for exceptionally low emission, non-hazardous product systems.

The system solutions from wedi have a wide range of differing technical building approvals and test certificates.

With the sliver Architects' Darling award in 2013, wedi was honoured as one of the most popular German manufacturers in the construction sector.

The wedi product systems have been technically tested and labelled in France by the CSTB (Centre scientifique et technique du bâtiment).

The wedi construction systems are labelled with the leading Finnish emissions classification. In this context, M1 stands for the highest quality.

The wedi sealing systems for wet rooms are tested and certified according. CE labelling, VOC classification as well as barrier-freedom – both the individual products as well as the complete system configurations by wedi are put to the acid test according to strict quality and safety criteria. The result: Superior guaranteed safety with unrivalled ease of use.

The barrier-free wedi products have been tested, assessed and certified for their conformity by the DIN CERTCO organisation for conformity assessments.

When manufacturing its products, wedi uses certified green electricity from renewable energies.

The wedi product systems satisfy the construction guidelines and regulations that are valid in England, Wales, Northern Ireland and Scotland.

The Norwegian test seal, which corresponds to the European requirements, certifies the high technical quality of the wedi product systems.

The wedi quality management and the high product quality are labelled with the Finnish VTT test seal.

The MK test seal qualifies wedi products for use in Denmark in accordance with the country-specific guidelines, norms and standards.
